Helping Community Banks to Secure, Monetize, and Scale Depositor Cash

FICA For Banks is a simple, yet powerful tool that allows banks to turn deposits into assets by easily monetizing customer deposits off the bank's balance sheet while retaining the customer relationship.

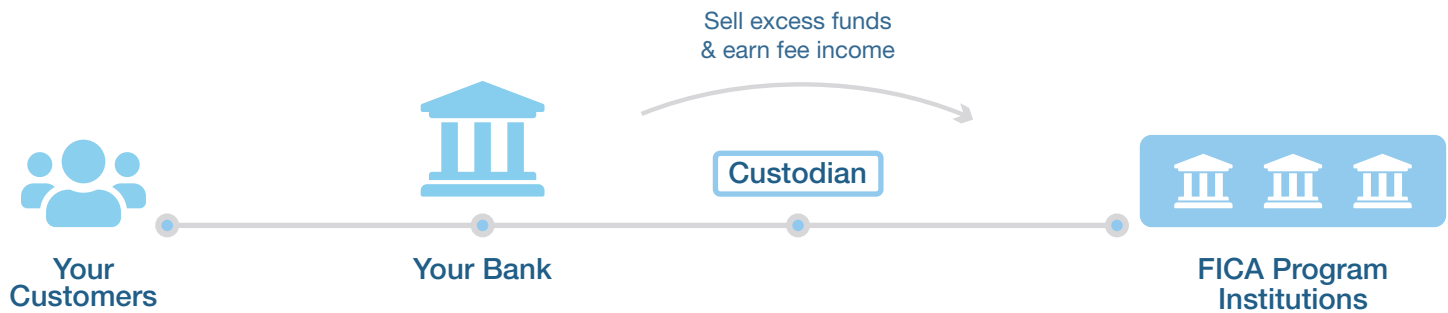

In times when too much cash is coming to the bank, you can provide your customers with up to \$25 million of FDIC insurance per tax ID¹ by sending these deposits into one or more FICA network banks in increments of no more than \$250,000 per bank per tax ID. Your customers can benefit from high levels of FDIC insurance while your bank can avoid the capital charge and interest costs of holding these deposits "on balance sheet".

While your bank may have excess deposits, many of the 800+ banks in StoneCastle's network may have a need for and pay market interest rates for this funding.

Benefits to Your Customers

- Consolidate uninsured held-away balances through one fully insured banking relationship
- Valuable for foundations, non-profits, HOAs, others that have strict investment policy rules for cash (must be FDIC insured or collateralized by US Treasuries)
